131 1878 Morgan's design for the Standard Dollar. Having been *adopted*, this coin is, properly speaking, not a pattern, but belongs to the *regular* series. As the illustration shows, only very slight changes were made in the die, after the adoption. In fact, it forms *the first variety* of the Standard Dollar, and is *extremely rare indeed.* Brilliant silver proof.

132 —— Goloid Metric Dollar. The *original*, same in design as the issue of 1879, but the 1878 die having properly been destroyed after few impressions had been taken, *of highest rarity.* Goloid proof.

133 1879 Goloid Metric Set. $4 Gold Stella, Goloid Dollar, and Silver Metric Dollar. Brilliant proofs. 415 sets struck; 150 still at the Mint. These may possibly be melted up, but even if sold, the 415 sets form such a small proportion to the several thousand coin collectors, that they are sure to bring in the future very high prices.

UNITED STATES SILVER DOLLARS.

134 1794 Very fine indeed. The stars to the left of Liberty are on these dollars usually very weak, or almost invisible. This piece, however, has all the stars equally good. Head well struck, date and word "Liberty" very good. A very desirable specimen, one of the best lately offered.

I would here remark, upon the authority of Mr. J. Colvin Randall, that there were not over 75 of these dollars coined, and of this number, some undoubtedly must have been melted during the late war. As there are hundreds of collectors of Dollars in the United States, the rarity of these pieces must be apparent to every collector.

(The term "Sovereign" must not be confounded with the modern Sovereign, and I therefore add the diameter of these early Gold Coins as a guide to our collectors.) The rarity of this Crown will be apparent, if collectors will examine the numismatic works in their libraries. Even the most renowned authorities seem to be unaware of its existence.
